It is scientifically proven. The human brain is able record and categorize an infinite amount of data for recall. Combining the senses of sight and sound as it's learned, *is the secret.*

God calls his people to sing psalms, hymns, and spiritual songs with gratitude in our hearts to God. With this unique tool you and your whole church can be witnesses of his word to others. Usually, singing the song about twenty times or more, will surprisingly cause you to remember it, word for word. The songs are all foundational passages that Christians need to have in our hearts. It takes a little effort, but it is fun to do, and so rewarding. Try singing a verse along with the CD or the computer, or from your digital recorder while you walk or jog.. You can retain it with a little practice to share it later.
